Projects

AI-Based Gaming Behavior Prediction and Monitoring System <i>Full-stack gaming behavior monitoring system with AI-driven risk prediction</i>	Apr. 2026–May. 2026
• Tools: React.js, Node.js, Express.js, MongoDB, Random Forest, Python, JWT, Tailwind CSS, WebSockets, Axios. • Developed a full-stack gaming behavior monitoring platform with secure authentication, session tracking, and real-time dashboards. • Integrated a Random Forest model via REST APIs to predict user behavior from gameplay patterns. • Implemented JWT-based authentication with role-based authorization and protected REST APIs, ensuring secure access control and scalable session management. • Developed Express.js REST APIs with MongoDB and WebSockets for gaming sessions, predictions, and alerts.	
SplitReceipt — AI-Powered Receipt Splitting <i>OCR + LLM-powered full-stack app to parse and split restaurant bills</i>	Feb. 2026–March 2026
• Tools: React.js, Node.js, Express.js, MongoDB, OCR.space API, Groq LLM API, JWT, HttpOnly Cookies. • OCR and LLM based receipt parsing into structured JSON. • Proportional tax splitting engine. • JWT authentication with refresh tokens. • Express REST API with Mongoose schemas.
